DATA IN THE NATIONAL MEDICINES VERIFICATION SYSTEM

The National Medicines Verification System (NMVS) is continually growing and developing, and the data volume is a clear indicator of that growth.

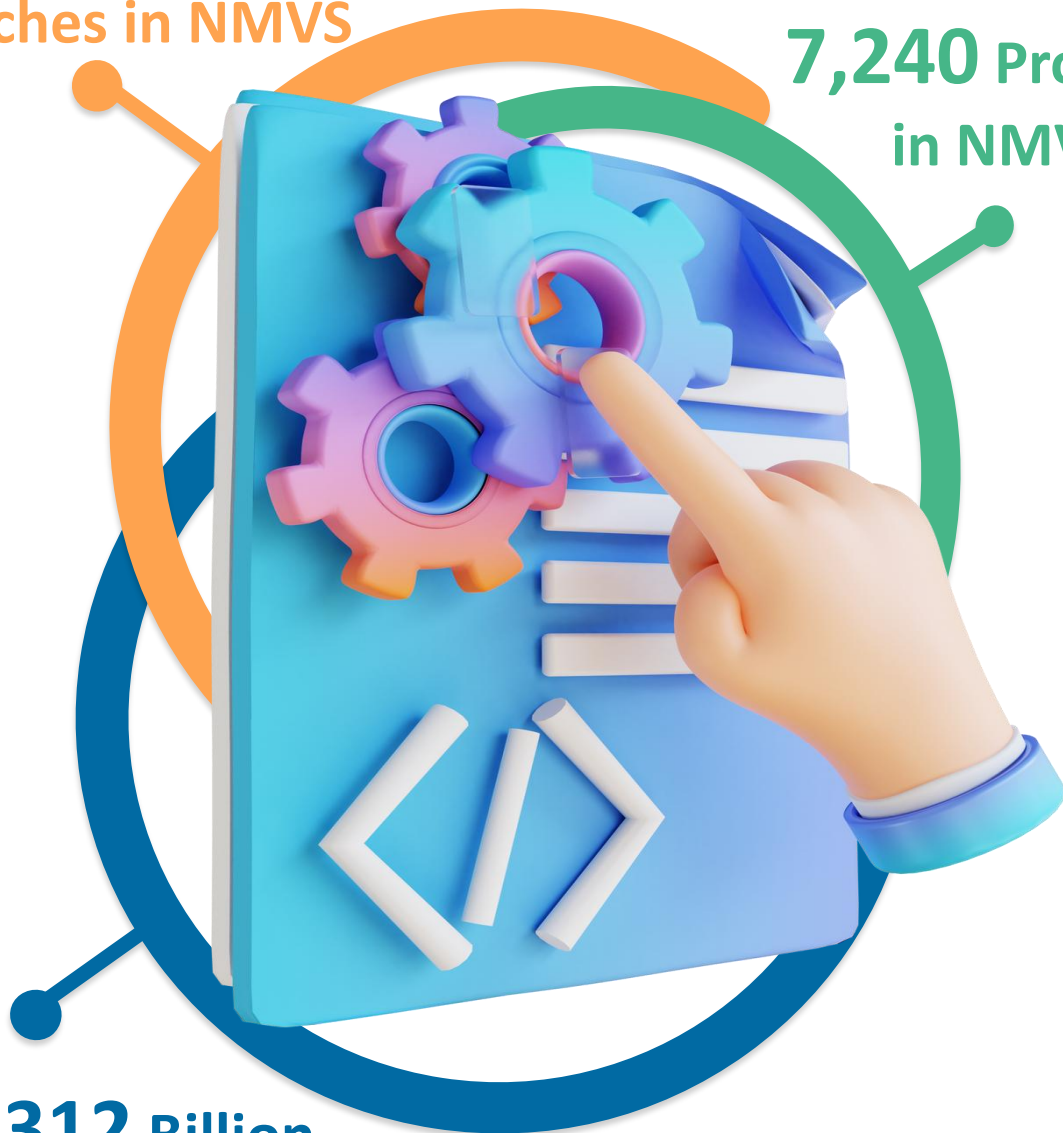

The NMVS is consolidating its status as a fundamental platform for safe and authentic medicines.

DATA IN THE NATIONAL MEDICINES VERIFICATION SYSTEM

During the *first 5 months of 2025*, a total of approximately *419,000,000 transactions* were performed by End-Users in the NMVS.

This very large number of transactions is a testament to the importance of the system in protecting patients' safety: *each scan is a step towards a safer healthcare environment.*

NMVS Transactions

ON-BOARDING UPDATE GREECE

Greece has made significant steps forward in connecting End-Users to its system, having reached a total of **10,881 users successfully integrated**.

Currently, the system remains in the tolerance phase to accommodate both the authenticity tape and the 2D Data Matrix code.

ON-BOARDING UPDATE ITALY

The Italian NMVS is expected to connect to the EU Hub during the inter-operability testing (IOT) window in October 2025. After this, a **Pilot phase will begin and is planned to run until Spring 2026**.

To ensure smooth setup and operations during the Stabilisation Period, it is essential that all MAHs for the Italian market complete their onboarding to NMVO Italia as soon as possible.

For more details on the on-boarding of the two countries, **please read the latest edition of the EMVS Community Newsletter – EMVO LinkedIn Page**.
